

Introducing...

...our Safety Kit List.

Printed Social Distance Floor Tape

A hard wearing floor marking tape, with the text "Please Keep a Safe Distance of 2 Metres" clearly printed in black, on a yellow background. As part of the manufacturing process a special laminate is applied after printing. This keeps the message protected and increases durability in higher traffic areas.

Hazard Marking Floor Tape

A range of traditional floor marking and laminated floor marking tapes are available for dividing warehouse/factory areas, durable enough to withstand pedestrian as well as warehouse traffic.

Surface Sanitiser Spray

Shared spaces and equipment such as machinery and forklifts can be time consuming to sanitise between users. Our solution to this is a high performance, alcohol free spray mist sanitiser. Once sprayed onto a surface it dries quickly and does not need wiped. EN1276 (Bacteria), EN1650 (anti-fungal), EN14476 (viruses including coronavirus)

Social Distancing Floor Stickers

Easy to fit, hard wearing and are another highly visual way to promote and remind your team, visitors or customers of the social distancing message throughout your company/organisation.

Social Distance Hi-Vis Vests

Finally, we offer a high-vis vest printed to remind of the social distancing requirements in place across society.
